McCall, World Analysis Branch, International Economics Division, Economics, Statistics, and Cooperatives Service, U.S. Department of Agriculture, Washington, D.C. 20250.

DIGEST

U.S. Agricultural Exports Up 36 Percent In First 5 Months Of Fiscal Year 1980 (see p. 4). Farm product exports advanced to \$17.6 billion during the first 5 months of fiscal year 1979/80. Increased shipments for feedgrains, wheat, cotton, animal feeds, soybeans, and protein meal accounted for most of the gain. Exports to most regions were higher, especially those to Western Europe, the U.S.S.R., Eastern Europe, and Latin America.

U.S. Agricultural Imports Rise 14 Percent In First 4 months Of Fiscal Year 1980 (see p. 60). U.S. agricultural imports totaled almost \$6.1 billion during October 1979-January 1980, 14 percent higher than last year's. Price increases caused the gain as most major imports increased in value. Competitive items rose 16 percent over the previous year's value to \$3.4 billion, while noncompetitive imports increased 10 percent to a total of \$2.7 billion.

Agricultural Export Shares By Region And State, Fiscal Year 1979 (see p. 94). Farm product exports reached almost \$32 billion in 1978/79, registering a 17-percent gain over 1977/78. Most commodity exports, including sunflower seeds, hides, meats, feedgrains, wheat, and cotton, increased in 1979. All States except Alaska shared in the gain, and 10 States accounted for over 57 percent of the total.

Commercial Exports Under CCC's Export Credit Sales Program Decline Slightly In Fiscal Year 1979 (see p. 103). Commodity Credit Corporation (CCC) credit sales totaled \$1.5 billion in fiscal year 1979, slightly below last year's record but more than double 1977's level. Korea, Poland, Portugal, and Pakistan were important CCC agricultural markets.

Selected Prices Of International Significance (see p. 106). Prices for farm products averaged higher during February, and most were sharply above year-earlier levels. Increased prices for corn, soybeans, rice, cotton, sugar, and rubber more than offset declines for wheat, coffee, and beef.

U.S. AGRICULTURAL EXPORTS UP 36 PERCENT IN FIRST 5 MONTHS OF FISCAL YEAR 1980

U.S. exports of farm products soared to \$17.6 billion during October-February 1979/80, 36 percent above last year's level. Strong foreign demand, especially in the U.S.S.R., Eastern Europe, Asia, and Western Europe, coupled with abundant U.S. supplies, contributed to the improved export performance.

Agricultural export volume in the 5-month period jumped 31 percent to 71 million tons, led by increases in feedgrains, wheat, cotton, soybeans, animal feeds, and rice. Large grain and oilseed shipments in October continued at record monthly rates through February.

Agricultural exports to Western Europe swelled by about \$1.3 billion over the first 5 months of 1978/79, approaching \$5.7 billion. Shipments to the European Community (EC) rose one-fourth, while those to the other West European countries (primarily Spain, Portugal, Norway, and Finland) jumped 40 percent to \$1.4 billion. Grain accounted for a large part of the expansion.

Asian countries imported nearly 33 percent of all U.S. agricultural exports during October-February 1979/80, compared with over 37 percent for the same period a year earlier. Shipments to East Asia increased in value, although growth was slower than to most other areas. Exports to West and South Asia fell from 1978/79 rates.

The U.S.S.R. and East European countries have purchased large amounts of grain and oilseeds from the United States because of last season's poor crops in those countries. About \$2.3 billion in farm products moved to those countries during October-February 1979/80, compared with less than \$800 million in the first 5 months of fiscal 1979.

Agricultural exports to the U.S.S.R. more than tripled, while those to Eastern Europe more than doubled. Shipments to the U.S.S.R. were affected by the export suspension imposed in early January. January exports, at \$159 million, were substantially below December's \$343 million level. Shipments of grain covered by the U.S.-U.S.S.R. agreement continued, however, and exceeded January 1979's value. In February, exports to the U.S.S.R. dropped below January's value as remaining amounts subject to the 8-million ton agreement level diminished.

Largely because of import demand in Mexico, Brazil, Venezuela, and Colombia, agricultural exports to Latin America reached \$2 billion, up sharply from last year's \$1.4 billion level. Drought conditions in Mexico and preharvest grain requirements in Brazil raised U.S. exports to the region.

Feedgrains, in tonnage terms, continued to be the leading agricultural export during October-February 1979/80. Thus far, feedgrains have outpaced soybeans in value. Feedgrain exports surged to almost 31 million tons in October-February 1979/80, compared with 20.4 million tons in the first 5 months of fiscal year 1978/79. Value jumped 82 percent to nearly \$3.9 billion. Even though corn shipments remain the largest component, grain sorghum's value nearly doubled to \$478 million. Shipments to Japan, the U.S.S.R., Eastern Europe, Mexico, Brazil, Spain, Portugal, and EC countries rose sharply.

Wheat export tonnage increased 25 percent over year-earlier levels to 14.8 million tons. Value jumped 62 percent to \$2.6 billion. Increased shipments went mainly to the U.S.S.R., Eastern Europe, and Africa, which more than offset reduced exports to China, Pakistan, and Iran.

The export value of oilseeds and oilseed products continued upward in the first 5 months of fiscal year 1979/80 to \$4.75 billion from \$4.15 billion in a similar period last year. Soybean shipments rose 14 percent to 12 million tons. Protein meal rose 23 percent to 3.4 million tons, and soybean oil gained 10 percent to reach 480,000 tons. Value outpaced volume gains due to price increases.

Animal feed exports jumped 55 percent in value to \$420 million, paced by corn gluten feed shipments which rose 52 percent to over 1 million tons.

Foreign demand for U. S. cotton surged ahead in early 1979/80. Cotton exports thus far this year totaled 843,000 tons, up two-thirds from the 504,000 tons shipped in October-February 1978/79. Prices also have increased, leading to a 75-percent value gain. Shipments to most countries were sharply higher, especially to China. China moved ahead of Japan and Korea, who were the first and second largest markets by a wide margin a year earlier.

1/ PRELIMINARY

U.S. AGRICULTURAL IMPORTS RISE 14 PERCENT IN FIRST 4 MONTHS OF FISCAL YEAR 1980

U.S. agricultural imports totaled almost \$6.1 billion during the first 4 months of fiscal year 1980, 14 percent higher than last year's. Price increases caused most of the gain as most major imports (with the exception of fruits and cocoa beans) increased in value. January imports totaled a record of nearly \$1.7 billion, 13 percent higher than a year ago.

Noncompetitive imports totaled \$2.7 billion during October 1979 through January 1980, nearly 11 percent above the previous period. The largest value gain was in green coffee (representing over half of all noncompetitive imports), which rose 27 percent. However, the quantity imported fell slightly as import prices rose from \$1.36 per pound during October 1978-January 1979 to \$1.79 per pound during the first 4 months of fiscal year 1980. January's green coffee imports reached the highest monthly level in over 2 years--\$477 million.

Higher prices pushed dry rubber--the second leading noncompetitive import--up 8 percent as the quantity imported declined. Small value gains were recorded in most other noncompetitive imports, except cocoa beans and cocoa powder.

Competitive imports totaled nearly \$3.4 billion, 16 percent higher than a year ago, with gains mainly in beef and sugar. Fresh and frozen beef and veal (comprising over two-thirds of all meat imports), which rose about one-fifth in value to \$621 million, declined slightly in quantity. Import prices rose by about 25 percent. Pork imports, which were faced with increased domestic supplies, declined in value and price. This increase is expected to offset a decline in beef supplies in fiscal year 1980.

Significant changes in the 1976 Meat Import Act became effective January 1, 1980. ^{1/} The meats now covered include about 85 percent of all beef imports. The level of imports permitted under the law is now determined by a "counter-cyclical" formula which allows increased imports when domestic supplies are low and decreases them when supplies are high.

Sugar imports, at \$364 million, rose by nearly one-half; however, the quantity increased less than 6 percent. Sugar prices have climbed since October 1979. The January 1980 price was the highest in over 2 years and nearly three-fourths above last January's level. Rising prices are partly due to an anticipated fall in world production in 1980 and demand is expected to exceed supplies. The value of sugar imports is expected to increase in fiscal year 1980 due to rising prices.

Among other noncompetitive imports, live animals rose 28 percent in value in fiscal year 1979. The number of dutiable cattle (the leading animal import) declined. The liquidation phase of the cattle cycle ended in 1979, following 4 years of inventory decline.

Imports of coconut and palm oils increased slightly in value. The quantity of coconut oil--over 50 percent of all vegetable oil imports--declined as import prices rose by one-third. Higher prices caused the value of malt beverages, wine, and tobacco to increase.

Fruit and fruit preparations imports fell 14 percent as concentrated orange juice purchases declined considerably during the first 4 months of fiscal year 1980. Vegetables and vegetable preparations increased 13 percent.

^{1/} U.S. Department of Agriculture, Foreign Agriculture Circular, "Livestock and Meat", Jan. 1980, p. 2.

Table 12--U.S. agricultural imports: Value by commodity, October-January 1978/79 and 1979/80, and January 1979 and 1980

AGRICULTURAL EXPORT SHARES BY REGION AND STATE, FISCAL YEAR 1979

U.S. farm product exports totaled \$32 billion in fiscal year 1979 (October 1, 1978 through September 30, 1979), 17 percent above the previous year. Increases occurred in almost every commodity group, including sunflower seeds (up 65 percent), hides and skins (up 58 percent), and meats and meat preparations (up 23 percent). There were export declines in dairy products, cottonseed oil, and peanuts and peanut oil.

Every State had significant exports, except Alaska. Ten States accounted for over 57 percent of the total: Illinois, Iowa, Texas, California, Minnesota, Kansas, Nebraska, Indiana, North Carolina, and Missouri.

Soybeans, feedgrains, wheat, cotton, and hides and skins comprised 72 percent of the total U.S. agricultural export value in fiscal year 1979.

Soybeans and Products

Soybean exports continued their upward trend, holding first place among the principal commodities exported during fiscal year 1979. Corn Belt States such as Illinois, Iowa, Missouri, and Indiana have been the largest soybean producers. However, Minnesota gained in importance last year and preceded Indiana. Over 40 percent of U.S. soybean production was exported last year and if soybean products are added, nearly 55 percent of the soybean harvest was exported.

Feedgrains and Products

Feedgrain exports (corn, grain sorghum, barley, and oats, and their products) reached over \$7 billion during fiscal year 1979, ranking second in the national total. The four leading Corn Belt States (Illinois, Iowa, Nebraska, and Indiana) accounted for over half of the U.S. export share. Feedgrain exports represent about 36 percent of U.S. feedgrain production.

Wheat and Products

Wheat and flour exports -- recovering from the declining trend of preceding years -- rebounded strongly in fiscal year 1979, to total \$4.9 billion, a 17-percent increase from the previous year. Northern Plains States (mainly Kansas and North Dakota) are the largest contributors in wheat exports, accounting for almost one-third of the total, while Idaho and Montana increased their importance considerably. Over 67 percent of U.S. wheat production was exported during fiscal year 1979.

Cotton

Cotton exports registered a 12-percent value gain over last year, totaling \$1.9 billion in fiscal year 1979. Texas, California, Mississippi, Arizona, and Arkansas are the largest cotton growing States. Approximately 59 percent of all cotton production was exported.

Hides and Skins

Hides and skins, the fifth largest farm commodity export during fiscal year 1979, grossed over \$1.3 billion. Export value rose by 58 percent because of higher prices, although shipments declined by 2 percent in volume from last year. State shares for four States (Wisconsin, Texas, Iowa, and Minnesota) accounted for over 31 percent of total exports.

Methodology

The values shown in this report reflect each State's share in national exports. Benefits, to the extent that the Nation benefits from the export of a commodity, accrue to all producers of that commodity, even though relatively more of the commodity may be exported from a given (coastal) State than from a noncoastal State.

The values for agricultural exports shown for each State should not be interpreted as actual measurements of State origins of national exports. Most commodities pass through several storage points before actually being exported--losing their place of origin in the process.

Limited records are available on shipments between States, so State export statistics were based on domestic shares for the identifiable commodities according to each State's share of production or sales. The formula used to determine a State's export share of a commodity or commodity group was as follows:

$$X = A \times \frac{B}{C}$$

Where:

X = State export share in dollars.

A = Value of each U.S. commodity or commodity group exported in fiscal year 1979.

B = Commodity volume produced or sold in a State during calendar year 1978.

C = Total U.S. commodity volume produced or sold during calendar year 1978.

Example: (A) U.S. rice exports in fiscal year 1979 were valued at \$884,189,000.

(B) Arkansas' sales amounted to 51,998,000 hundredweights.

(C) U.S. production in 1978 totaled 136,970,000 hundredweights.

$$\text{Thus: } X = A \times \frac{B}{C} = \$884,189,000 \times \frac{51,998,000}{136,970,000} = \$335,665,000.$$

COMMERCIAL EXPORTS UNDER CCC'S EXPORT CREDIT SALES PROGRAM DECLINE SLIGHTLY IN FISCAL YEAR 1979

Five percent of all commercial agricultural exports in fiscal 1979 were shipped under the Commodity Credit Corporation's (CCC) Commercial Export Credit Sales Program. ^{1/} CCC credit sales totaled \$1.5 billion in 1979, slightly below last year's record, but more than double 1977's level (table 20). Corn, wheat, cotton, soybean oil, and soybean meal were the principal commodities financed by CCC credit.

Twenty-one countries in all regions of the world received CCC's commercially financed exports in 1979 (table 21). However, most CCC financing went to Korea and Poland, (each receiving about 25 percent of all CCC credit sales), and Portugal and Pakistan (each receiving about 10 percent). However, except for Pakistan, credit sales to these countries declined. Credit sales rose to several countries in Latin America and Eastern Europe, and also to Egypt.

The CCC program, while financing only a small proportion of total commercial agricultural exports, still provided financing for a large share of commercial exports to several countries, including Poland, 74 percent; Pakistan and Peru, each about 63 percent; Korea and Portugal, each about 40 percent; Romania, 35 percent; Greece, 32 percent; the Philippines, 19 percent; Egypt, 14 percent; and Brazil, 11 percent.

^{1/} For background information on the CCC program see the Jan. 1979 issue of Foreign Agricultural Trade of the United States, pp. 50-53.

SELECTED PRICES OF INTERNATIONAL SIGNIFICANCE

International prices for farm commodities averaged higher in February as price gains for corn, soybeans, rice, cotton, sugar, cocoa beans, and rubber more than offset declines for wheat, coffee, and beef. Wheat, coffee, cotton, rice, sugar, and rubber prices were sharply higher than they were a year earlier; soybeans and cocoa beans are the only major agricultural commodities that are currently priced lower.

The early January U.S. suspension of agricultural exports to the U.S.S.R. centered on wheat, corn, soybeans, and soybean products. The U.S. Department of Agriculture, in an attempt to cushion the price-dampening effects of the trade suspension on U.S. farmers, has adopted several measures, such as increased loan rates and reserve release prices for wheat and corn. ^{1/}

The U.S. Gulf ports price for wheat drifted downward to \$4.79 a bushel in February. However, the U.S. Gulf ports price for corn strengthened slightly to \$2.79 a bushel as a result of China's and Mexico's current interest in importing corn. The Rotterdam price of Argentine corn has surged, as the Argentines are expecting a reduced corn crop. Moreover, the U.S.S.R. has made import inquiries regarding Argentine corn. Because of reduced worldwide grain supplies this year, particularly wheat, wheat and corn prices remain above last year's level.

The U.S. Gulf ports price for soybeans strengthened slightly in February to \$6.80 a bushel. Soybeans are less affected by the trade suspension, as only 45 million bushels were to be exported to the U.S.S.R. out of a total U.S. soybean export forecast of 1.3 billion bushels. The vegetable oil complex also has ample stocks. Consequently, soybeans are priced 13 percent lower than they were last February. Soybean meal in Rotterdam was priced somewhat below a year earlier.

The Bangkok price for rice again rose to \$399 a ton, one-third higher than last February. Smaller rice crops in several Far Eastern countries strengthened prices.

The Osaka price for U.S. cotton has taken a dramatic upswing since November, reaching 90 cents a pound in February. Domestic and export demand are strong. This year, largely because of China's large purchases, U.S. cotton exports are higher than they have been in the past 20 years. Cotton has also been subjected to speculative buying in recent months.

Speculative buying outweighed the influence of adequate supplies of cocoa beans and sugar. Cocoa bean prices showed a slight upturn in February, despite larger supplies from this year's harvest. The New York spot price for sugar increased for the fourth consecutive month, reaching 25 cents a pound in February. World sugar production is lower than consumption for the first time in 7 years. Currently, there exists a 30 million-ton stock buildup.

Competitive selling from Colombia has been a factor in Brazil's lowering of its minimum export price for coffee to \$1.94 a pound. February's New York spot price for coffee was 50 percent higher this year.

New York spot prices for rubber have been climbing steadily during the past 2 years, as higher costs of producing synthetic rubber have made natural rubber more competitive. From January to February, the New York spot price for rubber rose 11 percent to 83 cents a pound. Heavy U.S.S.R. purchases have also been responsible for the recent boost in rubber prices.

MARCH/APRIL 1980

Economics, Statistics, and Cooperatives Service

The Economics, Statistics, and Cooperatives Service (ESCS) collects data and carries out research projects related to food and nutrition, cooperatives, natural resources, and rural development. The Economics unit of ESCS researches and analyzes production and marketing of major commodities; foreign agriculture and trade; economic use, conservation, and development of natural resources; rural population, employment, and housing trends, and economic adjustment problems; and performance of the agricultural industry. The ESCS Statistics unit collects data on crops, livestock, prices, and labor, and publishes official USDA State and national estimates through the Crop Reporting Board. The ESCS Cooperatives unit provides research and technical and educational assistance to help farmer cooperatives operate efficiently. Through its information program, ESCS provides objective and timely economic and statistical information for farmers, government policymakers, consumers, agribusiness firms, cooperatives, rural residents, and other interested citizens.
